### Top Dividend Play, Efficient ROE Management; BUY

- Keep BUY and THB126TP, 22% upside and c.10% yield. We still see SCBX as appealing in terms of: i) Being the top dividend play stock in the sector (an outstanding 10% dividend yield vs the sector average of c.5-6%), ii) its higher ROE and more efficient capital management vs other large peers, and iii) inexpensive valuations P/E and P/BV remain below -1SD from its historical mean.
- Reaffirmed its efficient capital management and high dividend payout policies. Management reaffirmed its intent for better capital management and ROE enhancement with a double-digit ROE target by FY26 as well as high dividend payout policy. One main mechanism to deliver higher ROEs is to keep its high dividend payout ratio.
- **1Q24** results in line with our and Street estimates. 1Q24 net profit came in at THB11.3bn (+3% YoY, +3% QoQ), relatively in line with our (THB11bn) and Street estimates (THB11.6bn). NIM contracted QoQ by 13bps. Asset quality remained manageable while coverage ratio is still solid and rather stable QoQ at 161%.
- Expect CardX to perform better in 2H24. Gen2 companies posted a net loss of THB0.3bn in 1Q24 due to loss incurred from CardX. Credit cost for Gen2 remained at a high level, at 9.6% of loans although still lower vs 10.4% in FY23. We expect Gen 2's performance to improve in 2H24 supported by the continuing outstanding growth at AutoX and improving performance at CardX backed by better asset quality control and lower credit cost. Note: CardX has strategically shifted its focus towards asset quality control rather than growth ie reducing P-loans exposure and strengthening its underwriting models and risk management platforms.
- Acquisition of Home Credit Vietnam Finance (HCVN) to strengthen its regional footprint. We see the 100% acquisition of HCVN (transaction value of c.THB31bn) as a strategic move for SCBX to explore its regional expansion in Vietnam and the ASEAN market in the long term. The deal is expected to be completed by 1H25 and enhance earnings (c. 2-3%) of SCBX's bottomline, based on FY23 data (Figures 7 and 8). It expects the capital impact of c.0.5-0.6% at bank level and c.1-1.3% on a consolidated basis. Note: SCBX affirms that this acquisition will not impact its current high dividend payout policy.
- Maintain forecasts and TP. 1Q24 net profit accounted for 25% of our FY24F earnings as such, we keep our forecast unchanged. SCBX continues to maintain its FY24 financial targets (Figure 2). Net fee income target remains a challenging task a view we share with management. As its 3.2 ESG score is in line with the country median, we apply a 0% discount/premium to its intrinsic value.

#### 1Q24 results wrap

Financial Services | Banks

**1Q24 results in line with our and Street estimates.** 1Q24 net profit came in at THB11.3bn (+3% YoY, +3% QoQ), relatively in line with our (THB11bn) and Street estimates (THB11.6bn). NIM contracted QoQ by 13bps (c.-5bps if excluding a one-off interest income from the prepayment of a large corporate client in 4Q23) – but it still declined at a slower pace vs other large peers (Bangkok Bank (BBL TB, BUY, TP: THB164) -15bps; TMBThanachart Bank (TTB TB, NR), -11bps; Krung Thai Bank (KTB TB, NR), -14bps). This is thanks to its better management of funding cost (-2pbs QoQ) especially through its loan-to-deposit optimisation strategy at the Bank mainly on: i) Lowering its high-cost and negative-carried deposits; and ii) repaying it high cost debentures (USD500m).

Loans grew 2.1% YoY and 0.9% QoQ, primarily driven by housing loans (+3.8% YoY, +0.9% QoQ) and corporate loans (+2.3% YoY, +3.4% QoQ) from SCB Bank and consumer loans from non-bank portfolio companies, especially loans at AutoX stood at THB41bn in 1Q24 (+230% YoY, +21% QoQ).

Asset quality remained manageable as NPL ratio excluding interbank loans in 1Q24 declined QoQ to 3.89% vs 3.99% in 4Q23. Coverage ratio (total allowance to NPLs) remained solid and stable QoQ at 161%. Despite the lower NPLs, SCBX still set aside a higher provision level QoQ (167bps vs 154bps in 4Q23) vs its guidance of 160-180bps for prudent reasons. This higher credit cost not only reflected the pre-emptive cushion for CardX for overall uneven economic recovery but also included management overlays for any economic uncertainties – which included an overlay for a corporate client in the hospitality sector under the blue scheme programme.

On its lending exposure for Italian-Thai Development (ITD TB, NR) of c.THB6bn as reported by local media, Prachachat, SCBX said it has already classified such loans under Stage 2 loan classification since FY23 and set aside c.75% of total loan exposure. It said this provisioning level is more than sufficient in the current circumstance.
